TRANSTAR™
EXTENDED CAB

MILES AHEAD

GETS THE WORK DONE
SO I CAN MOVE ON TO
**MORE IMPORTANT
THINGS. LIKE
MORE WORK.**

When it's time to move out, the last thing I can afford to hear is an excuse. And my International® TranStar™ fleet makes sure that never happens. The shortest BBC in its class, and oversized windshield, make the truck nimble and easy to handle. Which is a good thing, because the weight-saving options let me stack heavier payloads on each rig. And with Diamond Logic® Electrical System reducing diagnostic time by up to 20%, and an extended cab with a comfortable bunk, it's easy to see how my team keeps motoring down the road, getting it done. Miles ahead of what it means to be efficient.

LEARN HOW TO DO MORE AT
INTERNATIONALTRUCKS.COM/TRANSTAR

MILES AHEAD

1

Set-back axle with 50-degree wheel cut for better handling and the tightest turning radius in the business.

2

Sloped hood and windshield plus optional aerodynamic package create less drag and maximum fuel economy.

3

Front windshield and rear side windows offer a commanding, best-in-class view of the road that all but eliminates blind spots.

4

Critical electronic controllers located inside the cab, which improves durability while also making maintenance easier.

5

Diamond Logic Electrical System comes standard with convenience and safety features like electronic automated pre-trip exterior light check and parking brake alarm.

6

Ergonomically redesigned interior, including an optional tilt and telescoping steering wheel for maximum driver comfort and productivity.

7

Extend your hours of operation with a DOT compliant, 26" extended cab option featuring 9 cubic feet of storage under a 5" thick foam mattress.
